

ABOLADE LAWAL AKINDEJI

Phone no: +234 8063705793 linkin: www.linkedin.com/in/abolade-akindeji-206b35305

PROFESSIONAL SUMMARY

Senior Java & Kotlin Developer with 6+ years of experience building scalable backend, full-stack, and mobile applications. Skilled in Spring Boot, Kotlin, microservices, Android development, cloud platforms (AWS/Azure), CI/CD, and event-driven architectures, with a strong focus on performance, reliability, and secure systems.

CORE TECHNICAL SKILLS

Languages & Frameworks: Java, Kotlin, Spring Boot, Dropwizard, Hibernate, JPA
Mobile & Frontend: Android (Jetpack Compose), Flutter, React, Angular, TypeScript, **Cloud & DevOps:** AWS (EC2, ECS, S3), Azure, Terraform, Docker, GitHub Actions, CI/CD
Databases: PostgreSQL, MySQL, MongoDB, Cosmos DB
Messaging & Event Systems: Kafka, RabbitMQ, gRPC, WebSocket, Centrifugo
Testing & Tools: JUnit, Mockito, Jest, Testcontainers, TDD, Gradle, Maven, Git, Jib

PROFESSIONAL EXPERIENCE

GoalSpaces Technologies — Remote | *Senior Java/Kotlin Engineer* | Jan 2023 – Present

- Architected a modular backend using Spring Boot & Kotlin for a behavioral goal-tracking platform.
- Orchestrated multi-day user journeys using **Temporal workflows**, ensuring retries and idempotency.
- Delivered **AI-driven goal insights** and integrated **Azure AI Search** for dynamic recommendations.
- Developed containerized deployment workflows with Docker and Jib, improving build efficiency and release reliability.

VPN Application Platform — Android / Android TV | *Senior Android Engineer* | 2024 – 2025

- Developed a production-grade VPN application for Android and Android TV with secure global server connectivity, location switching, split tunneling, and connection failover support.
- Integrated AtomSDK & PureWL to manage VPN protocols, session recovery, connection lifecycle, and real-time state management using Kotlin Coroutines, StateFlow, and Jetpack Compose.

- Built secure networking layers with Ktor Client, implementing authentication, token management, retry mechanisms, and resilient API communication for high-availability VPN services.

Freelance Software Engineer — [Fiverr](#) | Java & Mobile Development | 2022 – Present

- Delivered **100+ freelance projects** for international clients, specializing in Java backend systems, Android/mobile applications, REST API integrations, and payment solutions.
- Collaborated directly with clients to gather requirements, troubleshoot production issues, and deliver customized software solutions on time.

Church Engagement Platform — Personal Project | *Full-Stack Kotlin Engineer*

- Built a full-stack church platform with **Kotlin backend, REST APIs, and web admin dashboard**.
- Implemented **real-time chat using Centrifugo**, a scalable pub/sub WebSocket architecture.
- Developed audio sermon player with streaming support; stored media in **AWS S3** and optimized with **CDN caching**.
- Ensured idempotent API behavior, secure authentication, and clean architecture.
- Built donation services using **Stripe for secure payment processing**, supporting one-time and recurring contributions with webhook-based transaction handling.

EDUCATION

Bachelor of Science (B.Eng.), Electrical and Electronics Engineering
