

ABOLADE LAWAL AKINDEJI

Phone no: +234 8063705793 linkin: www.linkedin.com/in/abolade-akindeji-206b35305

PROFESSIONAL SUMMARY

Senior Java & Kotlin Developer with 6+ years of experience delivering scalable backend, full-stack, and mobile applications. Skilled in **Spring Boot, Kotlin, microservices, Temporal workflows, event-driven systems, CI/CD, DevOps practices, Android/Kotlin mobile development, and cloud platforms (AWS, Azure)**. Proven ability to build reliable, high-performance systems, secure applications, and collaborate across cross-functional teams.

CORE TECHNICAL SKILLS

Languages & Frameworks: Java, Kotlin, Spring Boot, Dropwizard, Hibernate, JPA, REST APIs

Mobile & Frontend: Android (Jetpack Compose), Flutter, React, Angular, TypeScript, CSS/SASS

Cloud & DevOps: AWS (EC2, ECS, S3), Azure, Terraform, Docker, GitHub Actions, CI/CD

Databases: PostgreSQL, MySQL, MongoDB, Cosmos DB

Messaging & Event Systems: Kafka, RabbitMQ, gRPC, WebSocket, Centrifugo

Testing & Tools: JUnit, Mockito, Jest, Testcontainers, TDD, Gradle, Maven, Git, Jib

Security & Encryption: Android Keystore AES, Idempotent APIs

PROFESSIONAL EXPERIENCE

GoalSpaces Technologies — Remote | Senior Java/Kotlin Engineer | Jan 2023 – Present

- Architected a modular backend using Spring Boot & Kotlin for a behavioral goal-tracking platform.
- Built a personalized content engine with **Azure Cosmos DB** for dynamic articles, milestones, and tasks.
- Orchestrated multi-day user journeys using **Temporal workflows**, ensuring retries and idempotency.
- Delivered **AI-driven goal insights** and integrated **Azure AI Search** for dynamic recommendations.
- Developed containerized deployment workflows with Docker and Jib, improving build efficiency and release reliability.

VPN Application Platform — Android / Android TV | Senior Android Engineer | 2024 – Present

- Developed production VPN client using Kotlin & Jetpack Compose, with focus on **security, split tunneling, and reliability**.
- Integrated **AtomSDK & PureWL**, implemented session recovery, connection lifecycle, and reactive UI with StateFlow & Coroutines.
- Built secure APIs using **Ktor Client** with authentication, token management, and resilient retries.
- Persisted preferences via **Android DataStore** and encrypted sensitive data with **Android Keystore AES**.
- Collaborated with backend and QA teams to ensure smooth UX across Android mobile and TV.

Church Engagement Platform — Personal Project | *Full-Stack Kotlin Engineer* | 2024 – Present

- Built a full-stack church platform with **Kotlin backend, REST APIs, and web admin dashboard**.
 - Implemented **real-time chat using Centrifugo**, a scalable pub/sub WebSocket architecture.
 - Developed audio sermon player with streaming support; stored media in **AWS S3** and optimized with **CDN caching**.
 - Designed paginated, sortable, and secure APIs for efficient content delivery.
 - Ensured idempotent API behavior, secure authentication, and clean architecture.
-

EDUCATION

Bachelor of Science (B.Eng.), Electrical and Electronics Engineering
